

Experiment – 1

Question:

Create a simple cloud software application and provide it as a service using any Cloud Service Provider to demonstrate Software as a Service (SaaS).

Answer:

AIM: To create and deploy a simple cloud software application using Zoho Creator and provide it as a Software as a Service (SaaS) application.

PROCEDURE:

Step 1: Open the Zoho Creator website and sign in using a valid Zoho account.

Step 2: Create a new application by selecting the Create from Scratch option.

Step 3: Choose Web Application and provide an application name.

Step 4: Create a simple form with basic fields such as name, email, and description.

Step 5: Save the form and enable cloud access for the application.

Step 6: Share the application link with users to allow online access and usage.

Step 7: The software has been created.
