

Experiment – 2

Question:

Create a simple cloud software application for Flight Reservation System using any Cloud Service Provider to demonstrate SaaS.

Answer:

AIM: To design and implement a Flight Reservation System as a cloud-based SaaS application using Zoho Creator.

PROCEDURE:

Step1: Log in to Zoho Creator and create a new application from scratch.

Step 2: Create a Flight Details form to store flight information such as source, destination, time, and fare.

Step 3: Create a Passenger Details form to store passenger personal information.

Step 4: Create a Reservation / Booking Details form and add lookup fields to connect passengers and flights.

Step 5: Configure basic workflows to update booking status automatically.

Step 6: Publish the application and enable cloud access for users.

Step 7: The software has been created.

IMPLEMENTATION:

Flight Reservation System

The screenshot displays the 'Flight Reservation System' web application. The top navigation bar includes the system name, user profile, and trial status. The left sidebar contains menu items for Flight Details, Passenger Details, All Passenger Details (highlighted), and Booking Details. The main content area shows a table titled 'All Passenger Details' with columns for Passenger ID, Name, Age, Gender, Email, Phone, and ID Proof. Two passenger records are listed.

Passenger ID	Name	Age	Gender	Email	Phone	ID Proof (Aadhar/Passport)
2501	SAMANVI MEDARAMETLA	18	Female	samanvii0208@gmail.com	+919640535339	
13450	SAHASRA MEDARAMETLA	18	Female	sahasra0208@gmail.com	+919640535399
