

Experiment – 6

Question:

Create a simple cloud software application for Hospital Management system for SIMATS library using any Cloud Service Provider to demonstrate SaaS.

Answer:

AIM: To create and deploy a Hospital Management System for SIMATS as a cloud-based Software as a Service (SaaS) application using Zoho Creator.

PROCEDURE:

Step1: Open the Zoho Creator website and sign in using a valid Zoho account.

Step 2: Create a new application by selecting the Create from Scratch option.

Step 3: Choose Web Application and provide an appropriate application name.

Step 4: Create a Doctor Details form to store doctor information such as name, specialization, and contact details.

Step 5: Create a Patient Details form to store patient information such as name, age, gender, and contact number.

Step 6: Create an Appointment Details form and use lookup fields to link doctors and patients.

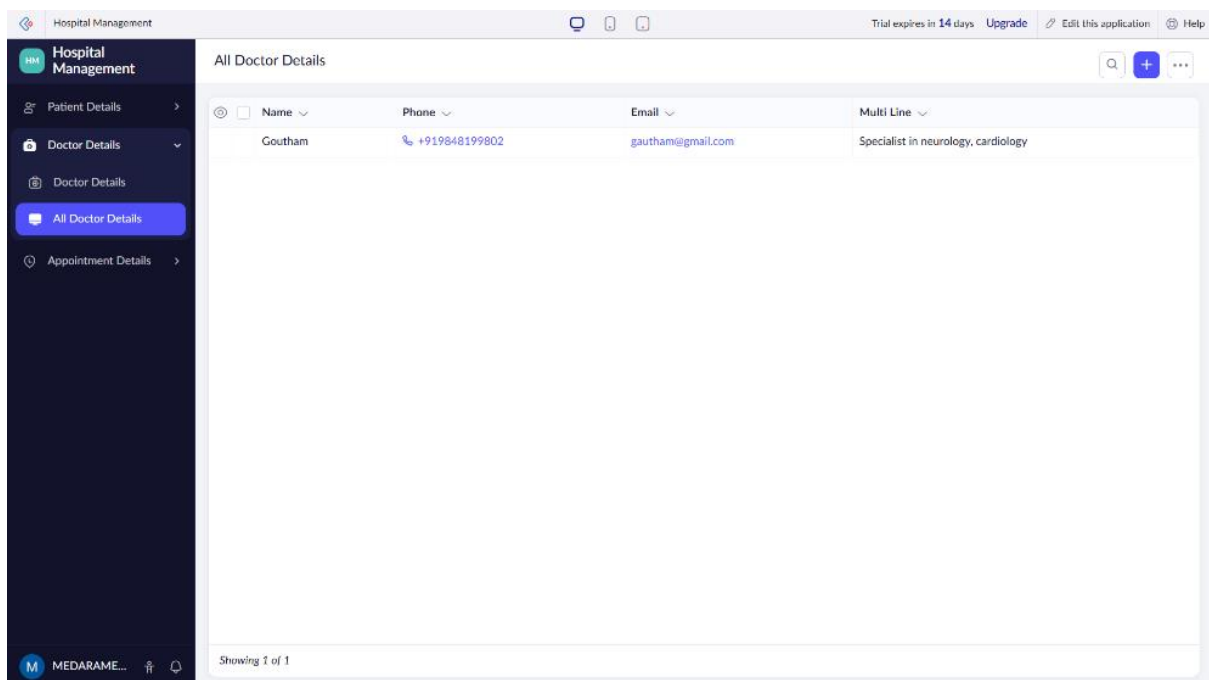

Step 7: Configure basic workflows to manage appointment status and scheduling.

Step 8: Publish the application and enable cloud access so users can use the system online.

Step 9: The software has been created.

IMPLEMENTATION:

Hospital Management system
